B4NP RECORDERS

Project Description

The B4NP podcast will soon need to replace the audio recorders they ship to guests for interviews. Finding an alternative to the current recorders and updating the existing materials will be necessary.

Objectives

Create intuitive, accessible tutorial that walks guests through the interview process from start to finish, with an emphasis on the technical components.

Audience

B4NP Podcast Guests

This podcast hosts theological scholars and practitioners who span all age groups, genders, sexuality, ethnicity, race, and familiarity with technology. Guests from the academic background often have doctoral degrees in theology and biblical studies. The education range for faith practitioners is more broad. Technological aptitude will be diverse across the board.

Project Roles

Sponsor: Jared Byas, Director of B4NP
Project Lead: Stephanie Speight, Producer of B4NP
SMEs: Dave Gerhardt, Audio Engineer for B4NP and Stephanie Speight

Project Constraints

Logistics: Members of the podcast team and guests are spread out geographically
Scope: The materials should be as brief as possible to respect guests' time
Development Timeline: One month (soft deadline)
